

**NEW PRODUCT RELEASE**  
**NL5500 Wireless Modem Provides Cost Effective Performance**

San Diego, CA: RF Neulink, a leading supplier of wireless data transceivers, has broadened its portfolio of wireless data products to include the NL5500. The NL5500 Transceiver Series is a price/performance leader in licensed conventional radios in both the VHF and UHF frequency range. The capability for transparent and direct asynchronous communication offers real-time communication. The NL5500 is fully compatible with RF Neulink's NL6000. It will communicate and coexist with NL6000s, while providing excellent throughput and long range for multiple address systems. The NL5500 Transceiver Series is field configurable as a master station or remote radio. These units can operate as a half-duplex or simplex radios. The simplex mode facilitates peer-to-peer radio communications while using a carrier sense (CSMA) channel collision avoidance technique.

For three decades RF Neulink has been providing wireless data networking solutions with applications in SCADA, telemetry, telecommunications, and water management. RF Neulink a division of RF Industries (NASDAQ RFIL), is a leading supplier of telecommunications and medical cable products through its company divisions. For additional information, call RF Neulink at 858-549-6340, 800-233-1728 or visit [www.rfneulink.com](http://www.rfneulink.com)
