

**RF Neulink Introduces
NL6000 Wireless Tranceiver**

The NL6000 is designed to meet new FCC narrow band requirements, the NL6000 operates at 12Kbps on narrow band channels and 22Kbps on a wide band channel. Built tough and reliable using digital technology, the NL6000 has outstanding radio channel performance.

The unit is configurable to operate not only wireless telemetry but mobile data as well. Transmit power adjustable from 1-6 watts allow mobile, fixed, and solar operations. Power requirements are from 11-16 volts DC. Small and compact, the NL6000 fits just about anywhere you need it. One unit does it all; you program the radio as a Base (Host), Remote, or a Repeater. A remote may function as both remote/repeater as needed.
