

### **Fiber Optic Cables – High Density MTP**

Cables Unlimited offers Corning fiber assemblies using Multi-fiber Termination Push-on (referred to as MTP) connectors designed by USConec. This compact design allows high-density connections between network equipment. A simple push-pull latching mechanism provides easy insertion and removal. Where space is an issue, the MTP allows for more connectors on the overcrowded faceplate, thus reducing the footprint of the systems. It will interface with current MPO connectors. It will

interface with current MPO connectors. Though about twice the size as an SC connector it can hold up to 12 fibers, thereby providing up to 12 times the density.

For a quote, contact Craig Catalano at Cables Unlimited at (800) 590-9965 or (631) 563-6363, or [quotes@cables-unlimited.com](mailto:quotes@cables-unlimited.com) or visit their website at [www.cables-unlimited.com](http://www.cables-unlimited.com).

Cables Unlimited is a division of RF Industries (NASDAQ RFIL) is a longstanding supplier of cables and wire harnesses. RF Industries is a leading provider of connecting solutions through its operating divisions: RF Connectors, RF Cable Assembly, Aviel Electronics, RF Neulink, RadioMobile, OddCables.com, Bioconnect, RF Precision Products and Cables Unlimited.
